OpenLogic

PERFORCE

DATASHEET

How to Assess and Prevent Risk for Your Enterprise Linux Distributions

Considerations	Risks	OpenLogic Offering
Who will support your Linux implementations?	Downtimes & wasted cycles	Variety of SLAs and unlimited support tickets
Does your sys admin know where to obtain Linux updates and patches?	Servers, VMs and containers left vulnerable	Support for most Linux distros
Are you monitoring Linux releases?	Delays that could lead to failure or security exploits	Level 4 Enterprise Architects providing support 24/7
How soon do you become aware of new vulnerability fixes?	Need for faster response than self support or community could provide	Download Hub with Linux builds and proactive security patches
How easily can you apply new critical security patches?		
How do you make sure you're getting the best solution available?	Complexity requiring broad & deep expertise	Unbiased advice with no vendor lock-in
