guidance***

Our Experts Are Ready to Help!

CentOS Long-Term & Technical Support

OpenLogic by Perforce provides extended transitional support for CentOS, including direct access to expert technical enterprise architects and post end-of-life security patches. This gives your team the ability to migrate confidently, on your terms, to make the best decision for your organization.

Buy Yourself Time

Extend migration for 5 years past CentOS community EOL

- Private access to CVE patches
- Stay compliant and stable
- Custom vulnerability reviews

Ask The Tough Questions

Every ticket is handled by enterprise architects

- Zero escalations!
- Unlimited support tickets
- 24/7/365 Availability
- Guaranteed SLAs

Find the Right CentOS Alternative

Unbiased advice from Linux experts

- Migration options
- Navigate OSS decisions
- Infrastructure evaluation

What Is Included in CentOS Long-Term and Technical Support?

With OpenLogic, every support ticket is answered by level 3+ Linux experts, no multi-layered support. Reduce time to resolve technical issues and increase your team's productivity with help from configuration to guidance on CVEs.

Post End-of-Life Patches

OpenLogic actively monitors for disclosed CVEs and provides patches for high-severity vulnerabilities - CVSS score 7+ - for a minimum of 5 years post end-of-life. The newly patched, built, and tested versions of CentOS packages are made available in a secure, private repository.

Migration Guidance

When you're ready to move on from CentOS, our team can help you to find the right enterprise Linux distribution to fit your needs.

Why Trust OpenLogic?

During our 20+ years of providing enterprise technical support for open source software, we've seen our fair share of community-supported projects reach end-of-life. Whether you need guidance and support to determine what's next, or are in need of extra time to ensure a seamless migration to an alternative OS, OpenLogic experts have you covered. Our long-term support extends the life of your CentOS deployments, mitigates risk, and ensures that your business doesn't notice an impact.
