DATASHEET

OpenLogic Support and Services for Apache Tomcat

Apache Tomcat is a critical component of Java-based applications for countless enterprises around the world. But ensuring Tomcat is secure, performant, and stable is a full-time job – one that organizations often aren't staffed for.

OpenLogic is a trusted provider of expert technical support and services for Apache Tomcat, ensuring organizations can enjoy the benefits of optimized Apache Tomcat without the risks.

Why Organizations Need Tomcat Support

STABILITY FOR BUSINESS-CRITICAL APPLICATIONS

Apache Tomcat is a critical component in many Java-based Enterprise applications. Maintaining dependable expert support is critical to keeping it secure and performant.

BUSINESS CONTINUITY

According to a recent Skillsoft report, 89% of IT leaders see losses in revenue due to IT skill shortages. OpenLogic provides continuity when your IT staff is disrupted.

INTERNAL / EXTERNAL COMPLIANCE

Applications using open source software not only need dedicated support, internal and external policies often require it. OpenLogic can help you remain compliant.

Why Choose OpenLogic?

- On-Demand Technical Expertise Delivered Directly by Enterprise Architects
- SLA-Backed Support up to 24/7/365 and 1-hour response times
- 20+ Years of Experience Solving Complex Tomcat Issues for the Enterprise

"They readily share their expertise with our IT team, giving us the feeling of being within a community of developers."

- CTO at Financial Services Company
