OpenLogic

Hardened Linux Images

CIS-Benchmarked VM and Container Images

Deploy and Scale From a Tested and Secure Baseline

Lower your security risk by staying on supported versions of your chosen distro built from CIS-benchmarked images.

Meet Compliance Requirements More Easily

Our CIS-benchmarked images can help you comply with industry regulations like NIST, HIPAA, PCI-DSS, and ISO-27000 series.

### Avoid Vendor Lock-In and Reduce Costs Up to 40%

Proprietary software subscriptions can lead to paying for things you don't need. Migrate where you want and save up to 40%.

Why Choose OpenLogic?

Support and Services for Your Full Linux Lifecycle

OpenLogic offers a full suite of Linux support and services, including long-term support, migration services, hardened images, and expert technical support.

Deploy Where You Want, On-Prem, Cloud, or Hybrid

Unlike other providers, OpenLogic Hardened Linux Images are flexible, allowing you to deploy and manage your Linux infrastructure in cloud or on-premises.

We Can Support Your Full OSS Stack

We offer technical support and services for over 400 open source technologies, helping our customers consolidate vendors and significantly reduce costs.

Talk to your Account Manager to learn more about OpenLogic Hardened Linux Images, support options, and pricing.
